

OREO COOKIE MOON PHASES

YOU WILL NEED:

- 8 Oreo cookies
- A popsicle stick or other tool for scraping the frosting

WHAT TO DO:

1. Slowly twist an Oreo to maximize the amount of frosting on one side when you separate the halves. If it doesn't work, you should probably eat the cookie...and then try again.
2. Use the popsicle stick to create the phases of the moon out of the frosting.
3. Arrange the phases of the moon in order. Label the different phases. Show Schaub to get your marks.

FUN MOON FACTS:

- The moon moves away from the Earth about 2.8 cm every year
- 12 humans have walked on the moon
- The gravity on the moon is 1/6th the gravity of the Earth
- The moon averages about 238,600 miles from Earth
