

COURSE OUTLINE

Geology 12

SUBJECT/GRADE: Geology 12

TEACHER: Christoph Schaub

CONTACT INFORMATION: Christoph.Schaub@sd68.bc.ca

WEBSITE: www.theschaub.ca

ONGOING PROGESS UPDATES:

- Up to date assessment will be available on the MyED portal
- There will be a minimum of two formative reports communicated to parents throughout the semester. These will be accompanied by student self-assessments.
- One formal parent-teacher-student conference will be scheduled (date to follow)
- One summative report at the end of the semester

COURSE OVERVIEW

If you have always wanted to know more about the wonders of our planet and how humans go about using Earth's resources, this course is for you. This course is an introduction to physical geology and will examine Earths rocks and minerals, Earths geological and biological history, the formation and structure of rocks, plate tectonic theory, weathering and erosion processes. Geology 12 is a course designed to familiarize students with the geologic world. Students will be given the opportunity to apply their knowledge of geologic processes to interpret geologic situations from both a global and local perspective. Students will learn to understand the world around us: developing our international mindedness and giving them the opportunity to better understand our community, and environment. Throughout the course every effort will be made to show how Science connects to other areas of study and life in general. Students will also work to develop themselves as communicating, caring, inquiring, risk taking, knowledgeable, reflective, open-minded, principled, balanced, and thinking individuals. The curriculum is based upon the prescribed learning outcomes as described by the Ministry of Education: https://curriculum.gov.bc.ca/curriculum/science/12/geology

BIG IDEAS

- Minerals, rocks, and Earth materials form in response to conditions within and on the Earth's surface and are the foundation of many resources-based industries.
- Earth's geological and biological history is interpreted and inferred from information stored in rock strata and fossil evidence.
- The plate tectonic theory explains the changes that occur within Earth and to Earth's crust throughout geological time.
- The form, arrangement, and structure of rocks are affected by three-dimensional forces over time.
- Weathering and erosion processes continually reshape landscapes through the interaction of the geosphere with the hydrosphere and atmosphere.

CORE COMPETENCIES

A Core Competency is a skill that all learners need to have to be successful in all aspects of their life. There are 3 core competencies: Communication (Communicating & Collaborating), Thinking (Critical Thinking, Creative and Reflective Thinking), Personal (Personal Awareness and Responsibility, Social Awareness and Responsibility and Positive Personal and Cultural Identity).

ASSESSMENT PLAN

Course Evaluation

Tests & Quizzes	60%
Labs & Assignments	20%
Projects & Presentations	20%

Materials:

Each student will require: 3-ring binder, lined note paper, pen, pencil, eraser and ruler.

Assessment:

- 1. Student Self Assessment and Reflection
- 2. On Going Formative

Minor Assignments and Classwork

- Worksheets, projects, labs and reading assignments may be marked to assess current understanding of topics being studied.
- Usually self-marked

Homework and Application

- There is generally no homework in Geology 12 unless class time has been missed or not used effectively.
- Students are responsible for completing all work assigned while absent from class.

3. Summative

Projects, Tests & Quizzes

- Each unit will end with either a summative test, project, or combination of the two.
- Test re-writes will occur after or before school

Lab Activities and Major Assignments

- These must be submitted on time as requested.
- Skill in making observations, handling data, analysis of data and expression of student understanding will be emphasized. Format and neatness will be taken into account.

Work Habits:

Excellent (E) - Always uses class time wisely. Assignments are of exceptional quality. Strives to contribute to a positive classroom environment. Respects science equipment and materials and is always prepared for class and ready to work. Shows interest in science topics.

Good (G) - Effective use of class time, assignments handed in on time and complete, often contributes to class/group discussions, respect of science equipment and materials, and prepared for class.

Satisfactory (S) - Mostly uses class time effectively, most assignments handed in on time and complete, sometimes contributes to class/group discussions, no misuse of science equipment and class materials, and usually prepared for class.

Needs improvement (N) - Does not use class time effectively, assignment are not handed in on time or are not complete, does not contribute to class/group discussions, misuse of science equipment and materials, and not prepared for class.

Expectations

- ✓ Use of Class Time: Students are expected to show up to every class ready to work. Effective use of class time is important in order to keep up as well as to utilize the help of myself and classmates.
- Attendance: Whenever possible students should inform me in advance of an upcoming absence so that we can arrange a time to meet and make a plan in order for the student to stay on top of their work. With exception of an illness documented by the office, students will be expected to catch up on their own time. Students will also be expected to get any notes missed during an absence from a classmate. Students who leave the classroom before being dismissed without previous arrangements with me will be marked as absent.
- Late: Students who are late are expected to come in quietly and find their seat without disrupting the class. If a student is late on a test or quiz day they will not be given extra time. Habitual tardiness will be addressed on an individual basis.
- Missing Test or Quiz: Students who were not present for a test or quiz must arrange a time with me to write a different version of the test or quiz.

- Homework: Students will generally have time to complete most of their work in the classroom.
 But any work not finished in class will be expected to be finished at home. Classroom work will be checked for completion and some assignments will be handed in for marks. Work will not be accepted after a unit is finished.
- Technology: Technology can be a great tool for learning but when it becomes a distraction, it negatively impacts students. <u>Barsby is a cell</u> <u>phone FREE school.</u> Students are expected to keep their cellphones in their bags or lockers during class and not be listening to music during lessons.
- ✓ Extra Help: Extra help is always available for students who require more help. Come see me to arrange a time that works for both of us.

Respect yourself, your classmates, teachers, the classroom and materials.
