

# Assignment 1: Offer a Service

- Create a console app that offers a service.
  - Offering to convert Celsius to Fahrenheit, Kelvin etc
  - Convert your weight to the weight on different planets
  - Convert your money to money in a different country
  - Convert your taste in music to a better taste like country
- Your app should engage the user in dialogue, give clear indications of what to press for different options (since we will have zero error handling)
- If Schaub hasn't taught a basic if statement he needs to do this now.

```
String userInput = "salami"
```

```
if (userInput == "salami")
```

```
{
```

```
    Console.WriteLine("Salami goes in a sandwich");
```

```
}
```

```
else
```

```
{
```

```
    Console.WriteLine("Not good for a sandwich");
```

```
}
```
